

# Health Care for the Poor and Neglected

Severely poor economic circumstances result in less attention to personal hygiene in the family which can create various medical problems. The problems are often ignored and can develop into severe long-term health related issues. Under Hidaya Foundation's **Health Care Program**, we have the following projects to assist such poor patients:

**Medical Assistance:** Poor patients suffering from contagious diseases are provided access to doctors, lab tests, medicines and follow-up visits, assistance is given to patients who need surgeries in the localities where Hidaya operates, and hospitals are provided with equipment, medicines and cash in order to better treat poor patients.

**Medical Camps:** Health camps with medical teams, medical supplies and medicines are sponsored and arranged in poor remote areas to benefit the poor.

**Preventive Health Care Education:** Informational brochures are published and distributed to help inform and educate the poor about the causes, preventions, and cures of common and contagious diseases.

**Please donate, and may Allah give you good health.**

Sign up for our Automatic Monthly Donation Program or donate on our secure website using electronic check or credit card.
